## **Laser Technology is Stopping Genetic Hair Loss**

This amazing technology, developed by Denmark's leading laser light researchers, is now available to you in the Chicagoland area, as seen on CBS, 20/20, Night Line, Channels 9, 5, 7, and Fox News. Scientists have finally found the cause of hair loss and can now correct the genetic source to DHT's destruction of the hair follicle. It is now possible to rehabilitate weak, withered hair, and yes, even grow hair back. Call today for your complimentary evaluation. Results are guaranteed if you qualify for treatment.

*Following FDA guidelines  
No Drugs - No Pain - No Side Effects*
